 - Soft Skills: Problem Solving, Teamwork, Leadership
-

Projects:

AI-Powered Smart Expense Tracker

[Link](#)

Tech Stack: Android (Java/Kotlin), Node.js, Express.js, MongoDB, OpenAI, Firebase Authentication

- Developed an AI-powered expense tracking application that automatically extracts transaction details from payment notifications using an LLM, eliminating manual expense entry.
- Implemented intelligent categorization by analysing merchant, amount, date, time, and payment source, and securely storing structured expense data in the database.
- Built an AI financial assistant featuring spending insights, budget alerts with personalized roast messages, and expense forecasting to predict future cash flow and recommend cost-saving

Customer Churn Prediction

[Link](#)

Tech Stack: Python, Scikit-learn, Pandas, NumPy, Matplotlib

- Built a machine learning model to predict customer churn using customer data.
 - Performed data preprocessing, feature engineering, and model evaluation.
 - Compared classification models to improve prediction accuracy.
-

Experience:

Research Intern | National Institute of Technology Warangal

[Link](#)

Mentor: Asst. Prof. Raju

- Conducted a comparative study of ML/DL models for cancer detection using genomic data.
- Evaluated model performance and benchmarked results against published research.
- Skills: Python, Machine Learning, Deep Learning, Model Evaluation, Research Analysis.

Open-Source Contributor | GirlScript Summer of Code (GSSoC) 2026

- Delivered multiple merged pull requests and fixing bugs in opensource projects.
 - Improved application performance, functionality, and overall user experience.
-

Positions of Responsibility

NSS - Senior Volunteer

- Contributed to initiatives such as literacy programs and awareness campaigns on social issues.
